Traditional and  
innovative foodstuffs  
from

*Vietnam*

## Introduction

### Who What Why.

These are questions you may ask when looking at a new catalogue. Who are these people? What are they selling? Why should I choose them?

Asian Vital has all the answers.

### Who we are.

We are importers of quality food and beverage from Asia. We do not just taste samples. We regularly travel to visit our suppliers, and to look for new ones. This is why our prices are often better than our competitors, which buy from intermediaries.

### What we sell.

Our focus is on quality!

We are Italian, so we know a few things about food quality. We sell certified products of the highest standard.

Please look at our catalogue. It is constantly expanding, but if you have a special request do not be afraid to ask: we are flexible, and always looking for new products and markets.

### Why Asian Vital is different.

We are direct importers. We buy only from producers. This means better prices and stricter control on quality. It also means that we are in a better position to satisfy our Customers' requests for new products, personalized packaging or delivery.

**Packaging:** 250ml can and bottle, 290ml bottle

Soft-dried white dragon fruits are made from 100% fresh dragon fruits, no additives, no added sugars.

This is a 'farm to factory' product. The fruits are transferred to factory right after harvest every early morning, and immediately processed.

Soft-dried white dragon fruit is a powerful immunity booster thanks to its high C vitamin and minerals content. It is low in calories, less than 60 per 100 grams, but rich in fibers that help digestion. Its seeds contain omega-3 and omega-6 fatty acids decreasing the risk of cardiovascular disease. Recent studies show dragon fruit may help prevent and treat diabetes and its symptoms.

## Dragon fruit

### 100% white dragon fruit

Dragon fruit 85% ripe are harvested in the morning with GAP standards, transferred to factory in less than 2 hours and kept in cool room while processing.

Fresh fruits are washed with pure water in fruit washing machines, then transferred to a high-care area for slicing and peeling.

All sliced fruits are then evenly distributed over Inox 304 trays and sent to ovens already set at drying temperature.

The slices will be moved at regular intervals to make sure all slice sides are well dehydrated.

The finished product with 22-25% MC will be taken from oven and packed in a clean room.

**Packaging:** Pouch of 100 grams or upon request

## Coconut drinks

**premium quality:** Coconut water, Coconut cream, Coconut oil, Desiccated coconut etc.

**Packaging:** 180ml can, 205ml can and bottle, 280ml bottle, 300ml bottle, 350ml bottle, 330ml can, 500ml can and bottle

## Quality and Grading

Cashew kernels are classified as: First Quality Fancy; Second Quality Scorched, Lightly Blemished Wholes (LBW), Blemished Wholes (BW), Third Quality Special Scorched; Fourth Quality; and Dessert.

FIRST QUALITY FANCY cashew kernels have a uniform color which may be white, light yellow or pale ivory.

SECOND QUALITY SCORCHED cashew kernels may be yellow, light brown, light ivory, light ash-grey or deep ivory.

THIRD QUALITY SPECIAL SCORCHED cashew kernels may be deep yellow, brown, amber, and light to deep blue. They may be slightly shriveled, immature, light-brown speckled, blemished or otherwise discolored.

FOURTH QUALITY cashew kernels would qualify as First or Second Quality, except that they have pitted spots.

Lightly Blemished Wholes (LBW) cashew kernels may be light brown, light ivory, light ash-grey or deep ivory. Kernels may show light brown speckles or blemishes on the surface, provided that not more than 40 percent of the kernels are affected.

Lightly Blemished Pieces (LP) cashew pieces may be light brown, light ivory, light ash-grey or deep ivory. Pieces may show light brown speckles or blemishes on the surface, provided that not more than 20 percent of the pieces are affected.

Blemished Wholes (BW) cashew kernels may be deep yellow, brown, amber or light to deep blue. Kernels may be slightly shriveled, immature or may be brown speckled or blemished on the surface, provided that not more than 60 percent of the kernels are affected.

DESSERT cashew kernels may be scraped, deeply scorched, shriveled, deep-brown-speckled, black-speckled, blemished or otherwise discolored.
